

Amit Industries

CRAFTED TO ELEVATE WHAT YOU CREATE

Where Packaging Meets Purpose

About Us

Introduction

Shri Amit Industries, the flagship company of the Shri Group, was established in 2022 with a state-of-the-art manufacturing facility in Hyderabad. Growing from an initial production capacity of 1,400 tonnes per annum in 2022, we have now doubled our capacity to 2,800 tonnes per annum. We serve a diverse product portfolio catering to the Dairy, Paint, Agri, Lubricant, Food, Paper, and Packaging Industries.

Our facility is equipped with **advanced Injection Moulding, Blow Moulding, Automatic HTL and Screen Printing Machines**, enabling high-precision, efficient, and high-quality production. We are committed to continuous expansion, innovation, and adoption of cutting-edge technology in the packaging domain.

At Shri Amit Industries, we focus on delivering exemplary service, building long-term partnerships, and providing tailored solutions to meet the evolving needs of our customers. With an emphasis on quality, reliability, sustainability, and operational excellence, we strive to be a trusted partner across every industry we serve.

Mission

Our mission is to engineer high quality, zero-defect Packaging that elevates every product it holds. Through continuous innovation and operational excellence, we aim to deliver unmatched value and trust.

Vision

To be future-ready leader, delivering innovative and technology-driven solutions that drive sustainable growth across all industries we serve.

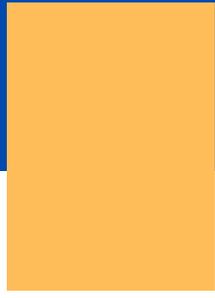

Why Us

Packaging: The Fifth "P" of Marketing

At Shri Amit Industries, we view Packaging not merely as a container but as a strategic brand asset- the **fifth P of marketing**. Beyond Product, Price, Promotion, and Place, Packaging shapes perception, elevates experience, and influences decisions. We craft solutions that enhances your brand at every moment of interaction.

Why Us?

- 1) High- Growth Momentum — Growing @40% YoY
- 2) A Trusted Name Across Every Industry We Served
- 3) Innovation at the Core
- 4) Reliability you can count on
- 5) On Time, Every Time
- 6) Driven by Sustainability

Our Infrastructure

Our premises house a state-of-the-art manufacturing facility, certified under **ISO 9001:2015**, reflecting our commitment to quality management, process consistency, and continuous improvement.

We operate a state-of-the-art, food-grade manufacturing facility equipped with 10 advanced Injection Moulding machines ranging from **150 to 450 tonnes**, all sourced from Ferromatik Milacron, ensuring high precision, hygiene compliance, and adherence to global manufacturing standards. All machines are integrated with RAM mechanism technology, delivering uniform strength, consistent wall thickness, and superior product durability, critical for safe handling, stacking, and transportation of dairy and food products.

Our facility features Screen Printing machines with a capacity to print up to 15,000 buckets per day, delivering sharp and consistent print quality. and also We have HTL machines, including one fully automatic unit, with a combined capacity to label up to 18,000 buckets per day.

FUTURE PLANS

At **Shri Amit Industries**, we are committed to continuous growth, technological advancement, and responsible manufacturing. Our forward-looking expansion roadmap includes:

➤ Adoption of IML Technology

We are preparing to introduce In-Mould Labelling (IML) technology, enabling premium aesthetics, superior durability, and access to high-value niche markets.

➤ Blow Moulding Capacity Expansion by 2026

Our Blow Moulding Machine division will undergo a major upgrade by 2026, enhancing efficiency and enabling us to cater to a wider range of industries.

➤ Overall Capacity Enhancement by 2027

By 2027, we aim to expand our total production capacity by an additional 3,000 tonnes per Annum, strengthening our ability to support growing and diversified demands.

➤ Sustainability Through Solar Energy

As part of our commitment to sustainable manufacturing, we will be installing solar panels to reduce energy dependency, lower carbon footprint, and operate in a more environmentally responsible manner.
